Dear Reach Up Colleagues,

We have just received information that the initial group of displaced people in Sebedoh are not being provided with temporary shelter arrangements and have set up in town centres.

The Govt is not pleased with this situation and have informed us that the IDP presence is contributing to a deterioration of security for residents in the area. They have also advised us that they are increasing their police and military presence as a deterrent.

They are asking you, as cluster leads, to remedy the situation immediately.

Please advise of your immediate response plans to address the apparent lack of temporary shelter.

Kind regards, etc
